

In close cooperation with the Dutch National Museum of Dredging in Sliedrecht (NL), Marten Lenstra, silversmith from Middelstum, made a silver bucket dredger. The dredger "Friesland", owned by the museum, was a major source of inspiration. This silver bucket dredger is offered by the museum to its sponsors and relations at a competitive price. This is an excellent chance to give your client or businesspartner a really unique present!

Length: 240 mm
Width: 60 mm
Weight: 650 g.
Sterling Silver
